EDUCATION

2018- Present | National University of Ireland, Galway | MSc Information Systems Management

Grade	First Class Honors, Semester 1 Grade (1:1)
Modules	Interactive Systems Design, Applied Systems Analysis, Information Systems Strategy and Innovation, Business Modelling and Analytics, Systems Development & Project Management, Web Design & Development, Business Applications Programming, Information Systems Management, Advanced Applications Programming, Business Data Communications, Database Systems, Enterprise Systems

Academic Project(s)

Module Name	Areas	Short Description
Interactive Systems Design	UI/UX	Participated in Empathy Jam Galway – UX Hackathon as part of the assignment and created a UI/UX prototype for reducing traffic in Galway. ([View Here](#))
Information Systems Strategy and Innovation	Business Canvas Model Analysis	Analyzed Deliveroo's Business Canvas Model as a team and provided recommendations on improvements that could be incorporated in the system to compete with their contemporaries.
Enterprise Systems	eHealth	Presented a report on e-mental health which is rampant with the current generation. ([View Here](#))
Web Design & Development	HTML, CSS & JavaScript	Developed a Wildlife Sanctuary website as part of a team project using the basics of HTML, CSS and JavaScript. ([View Here](#))

Systems Development & Project Management	Project Management	Identified a Project Management problem statement (Resource Dependency Management), reviewed papers in relation to it and prepared a report which illustrated the problem statement at hand and the recommendations that could be considered to avoid it.
Business Applications	Visual Studio C#	Developed several standalone C# Windows Form Applications related to banking, store management and so forth.
Advanced Application Programming	Object Oriented Programming	Developed an Efficient Football Stimulator Application as a team project. Also, Developed a Basic Bank Application as part of an individual assignment. Furthermore, created a suite of UAT Cases for Quality Assurance of the application.

Major Project: Official Website of NUIG Rugby Club (In Progress)

Temporarily Hosted: http://nuigrfc.ga

Technology Used: WordPress, HTML, CSS, JavaScript, PHP

SDLC: Agile

Roles & Responsibilities: Business Analyst, Quality Assurance Lead, Developer (Wordpress, UI/UX)

Description: Involves negotiation to clinch a real-time project, developing prototypes, wireframes, storyboards, UI/UX and delivering the final product to the client.

- As a Business Analyst, studied client requirements and developed business case to be proposed to the client. Also, involved in several meetings with the client to tune multiple requirements and proposed modifications from the client as the project progressed while categorising them into functional and non-functional. In addition, involved in building wireframes, storyboards, persona and scenarios in order to present a prototype of the final product to the client.
- As a developer, involved in development of NUIG RFC website using WordPress. Furthermore, designed the User Interface screens for the website.
- As a Quality Assurance Lead, built a suite of UAT test cases for the client to test the website. In addition, worked on testing the website during its development phase to ensure quality output.

2011 - 15 | Visvesvaraya Technological University, Karnataka | Bachelor in Engineering - Computer Science | Bangalore, India

Grade	Graduated with First-Class Honors. Percentage: 77.81% (Equivalent to 1:1)
Academic Project(s)	Developed an Android Application that communicates with the black box fixed inside a car. It utilized the GPS service to retrieve the location of an accident from the impact on the black box to share the information with the end user.

WORK EXPERIENCE

Oct 2015 – August 2018 | Consultant - Testing | Allstate Solutions Private Limited | Bangalore, India

Project Role(s)	• Consultant (Performance Tester)
Achievement(s)	• Awarded "Star of the Month" for tireless dedication, teamwork, commitment and exceptional quality of test results while seamlessly delivering the output. • Recognized for excellent performance on offshore project involving test execution, planning, migration of application platform and presentation of final results. • Promoted to the role of "Consultant" for outstanding contribution within the team.
Responsibilities	• Involved in Business Requirement Gathering with stakeholders to understand the non-functional business scenarios. In addition, excellent exposure in analyzing business requirements, creation of Test Approach document, preparing Test Report and presentation of Test Results to the concerned product stakeholders. • Involved in the creation of Proof Of Concept for performance testing related to web-services using JMeter. • Involved in implementation process improvement ideas within the team.

- Involved in performance review, designing and conducting various performance tests such as Load testing, Stress testing, Volume testing, Scalability testing and Endurance testing.
- Prepare performance plan, strategy covering environment, execution and summary of tests conducted. Also, creation of performance dashboards and test results for stakeholders.
- Expertise in scripting using HP LoadRunner Vugen, designing various test scenarios using Performance Centre 12.53 and Result Analysis (using LoadRunner Analysis).
- Monitor application, App server performance counters like CPU, Memory JVM heap.
- Define and implement best practices for end to end application performance management solutions.
- Training of New Recruits within the team.

ACHIEVEMENTS

- Secured the position of first runners up in Apps4Gaps Hackathon organized by Insight Centre for Data Analytics in association with NUI Galway Business Analytics Society.
